Plant Trees. In the scientific column of a Chicago journal, of July 4, it seems that the whole theory of cyclones was elaborated in a couple of lines. In an article for the history of Chicago (vol. 1. p. 588), the writer gave the following suggestion: "But Chicago has been writes, used to get up in his sleep, singularly free from the devastating cyclones that have cut swaths of ruin himself astride them, and then spur in all the conterminous country, and | nd whip the wall under the impresthe reasonable solution of the fact sion that he was mounted upon his appears to be that the light atmosphere | steed. of the lake absorbs the approaching | Dr. Pritchard had a patient who cyclone and disseminates it. Antagonists of our theory have adduced the simoon as a simoon as a contravention of its being a scientific fact, but, however, comforting the apparent contradiction may be to the "Robber Lumber Barons", it is, in fact, no substantial allegation adverse to the theory at all. The fact that the simoon is an intensely hot sandstone, while the norther is a very cold wind, negatives nothing, for pyrology has not yet demonstrated how hot air can be made; and it is only needful that one section of atmosphere should be hotter than the air in its vicinity for the heated portion to ascend and its found favor. # CAUTION.

I have had blood poison for ten years. I know I have taken one hundred bottles of iodide of potash in that time, but it did me no good. Last summer my face, neck, body and limbs were covered with sores, and I could scarcely use my arms on account of rheumatism in my shoulders. I took S. S. S., and it has done me more good than all other medicines I have taken. My face, body and neck are perfectly clear and clean, and my rheumatism is entirely gone. I weighed 116 pounds when I began the medicine, and I now weigh 152 pounds. My first bottle helped me greatly, and gave me an appetite like a strong man. I would not be without S. S. S. for several times its weight in gold.
